TYPOGRAPHY

Approved typefaces and usage rules.

CINZEL | Headings & wordmark

PEGGED GBP

STABLE STERLING, ON-CHAIN.

Weights in use: Regular 400, Bold 700, Black 900.

INTER | Body, UI & supporting text

The fixed-supply, GBP-pegged token.

Pegged GBP (PGBP) is a GBP-denominated ERC-20 token on Ethereum, designed to represent digital sterling on-chain.

Weights in use: Regular 400, Bold 700.

Usage rules

- Cinzel for the wordmark, headings, and short emphasis only.
- Inter for body copy, UI elements, captions, and any text below 16 pt.
- Maintain ample letter-spacing in Cinzel - it is designed for inscription.
- No additional typefaces.

MARK VARIANTS

Use the right variant for the size and context.

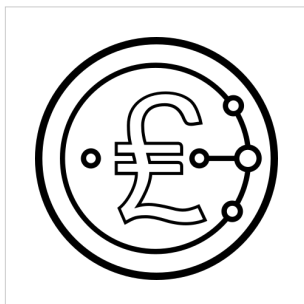

Master mark

For sizes 128 px and up.
Includes the network detail.

Small-size variant

For sizes up to 64 px.
Solid pound sign, single ring.

Mono - black

Single-colour print,
low-fi reproduction.

Mono - white

Use on dark or photo
backgrounds.

SIZE STRATEGY

Up to 64 px --> small-size variant

128 px and above --> master mark (CoinGecko / CMC at 200 px also uses master)

DO / DON'T

Rules for using the mark in any context.

DO

- Use only the approved palette: gold, teal, white, black.
- Use the small-size variant for any rendering below 64 px.
- Maintain a minimum 8% clear space around the mark.
- Export PNGs with transparent background unless a teal context is required.
- Use Cinzel for the wordmark and headings; Inter for body copy.
- Pair gold mark with teal or white backgrounds for best contrast.

DON'T

- Recolour, distort, rotate, or skew the mark.
- Add drop shadows, glows, gradients, or 3D effects.
- Place the mark on a busy photo without a teal underlay.
- Use the master mark below 64 px - switch to the small-size variant.
- Mix in additional typefaces beyond Cinzel and Inter.
- Combine the mark with the wordmark in any unapproved lockup.
